

## FUJITSU Intelligent Networking and Computing Architecture

Fujitsu has developed a set of software solutions that support the basis for deployment of SDN/NFV capabilities in wide area networks.

## FUJITSU solution for wide area network

Adopting Fujitsu's SDN/NFV solution is of great benefit to both end-users and network service providers.

### Benefits for network service providers

- Increase in revenue
- Lower OPEX
- Lower CAPEX

### Benefits for end-users

- Better service quality
- Cheaper services
- Expanded service offering
