

Spirent NFV Continuous Testing

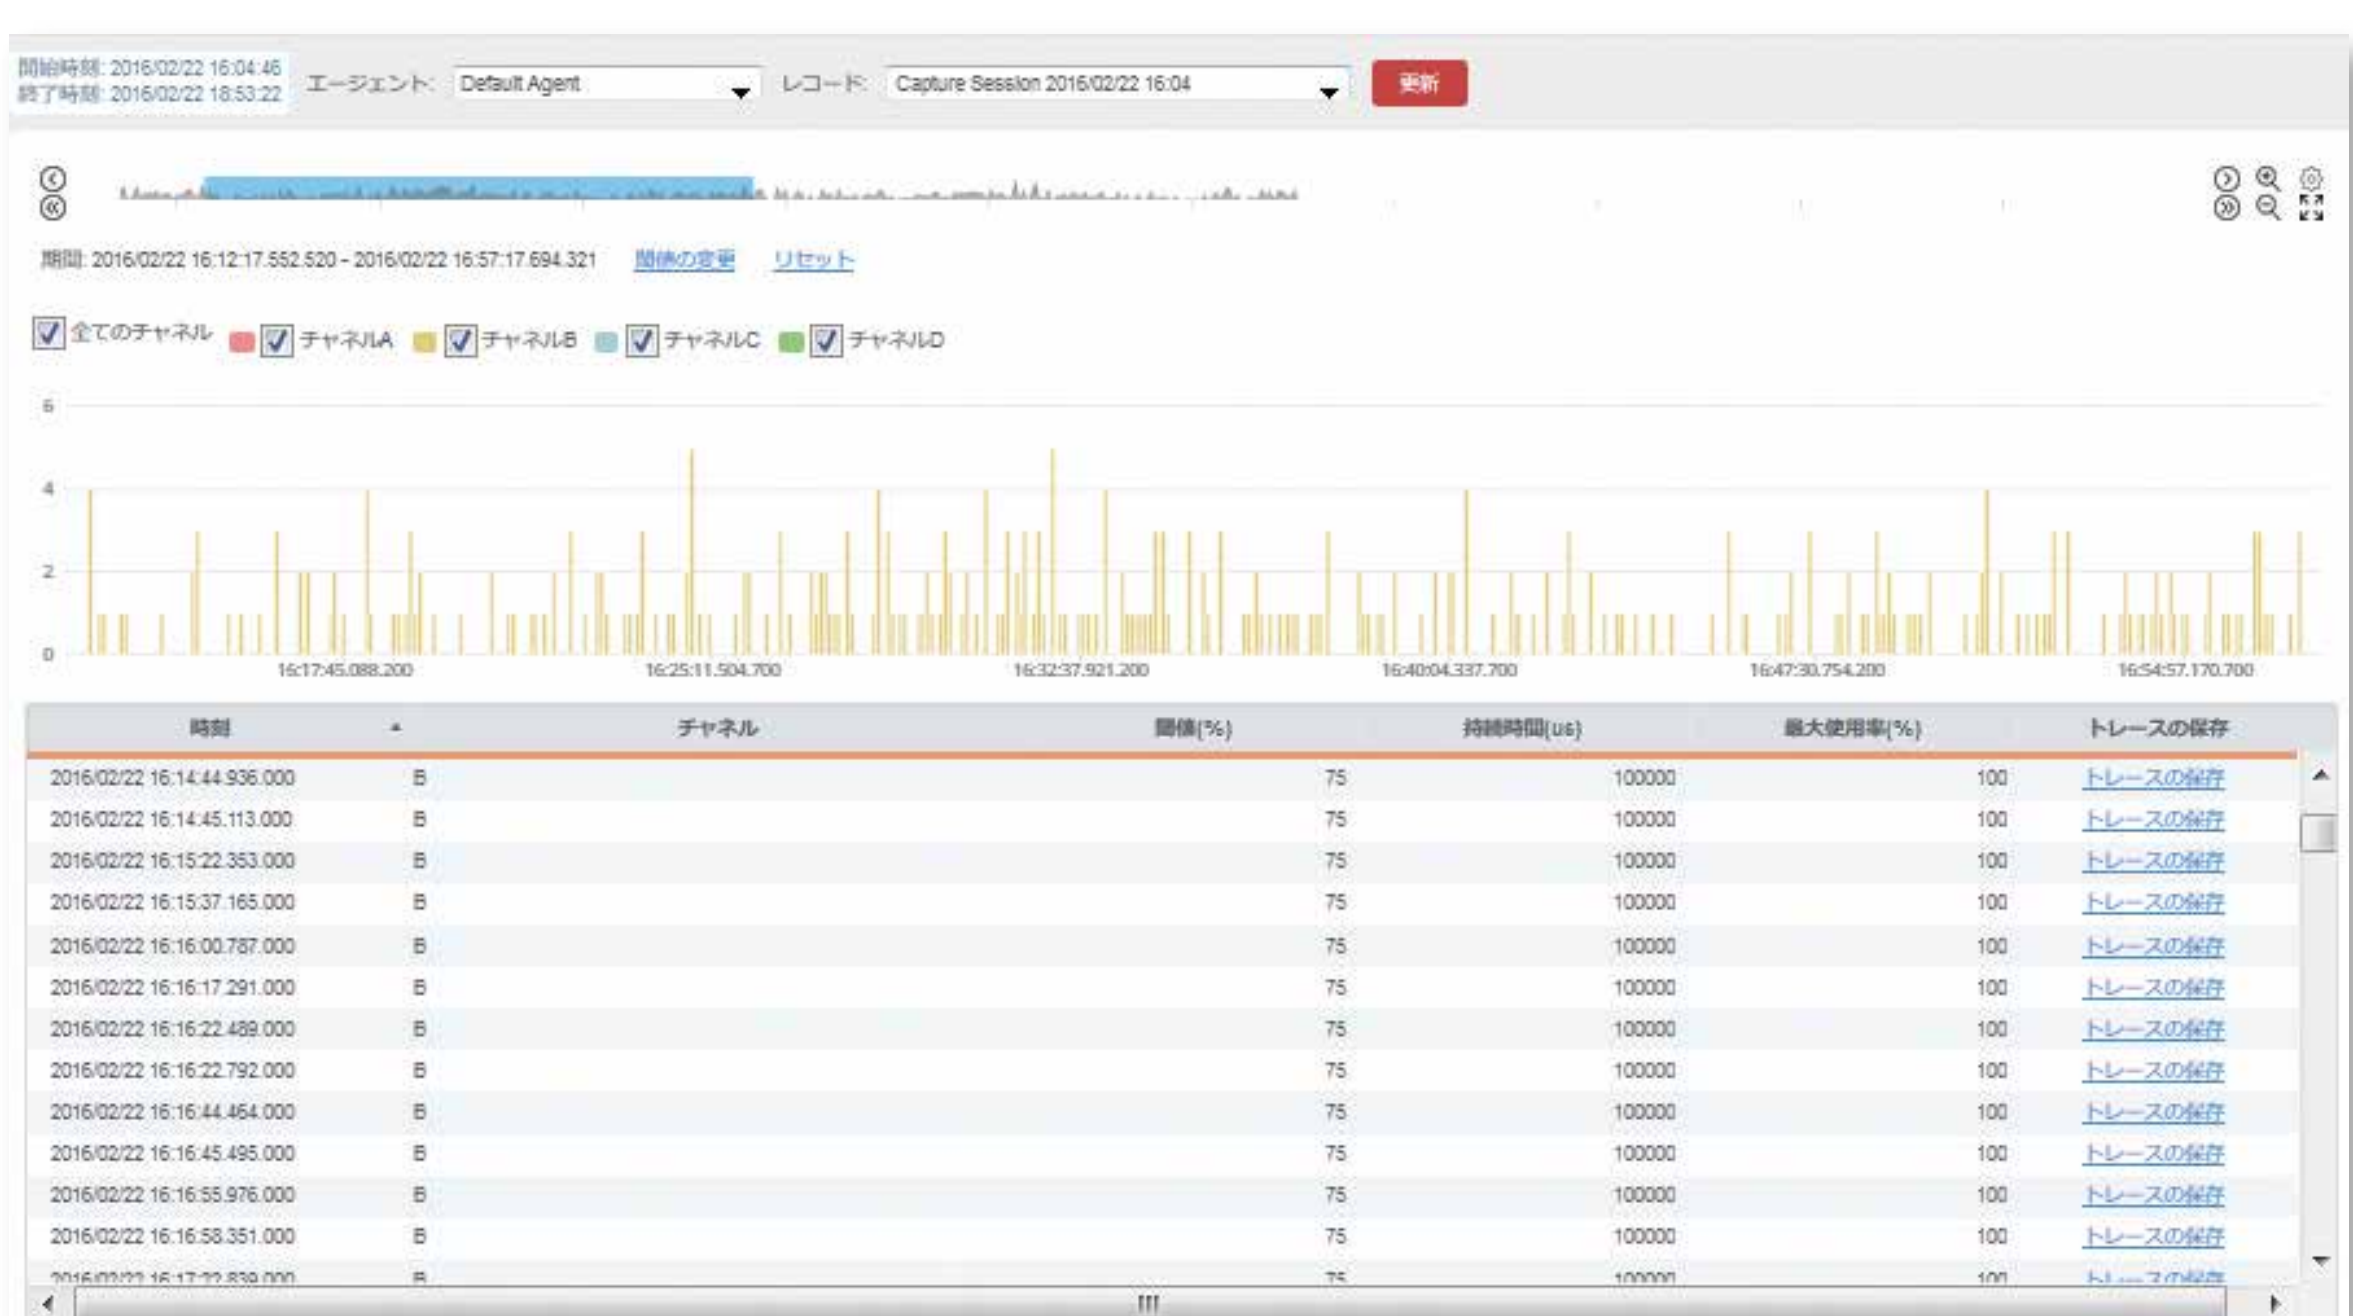

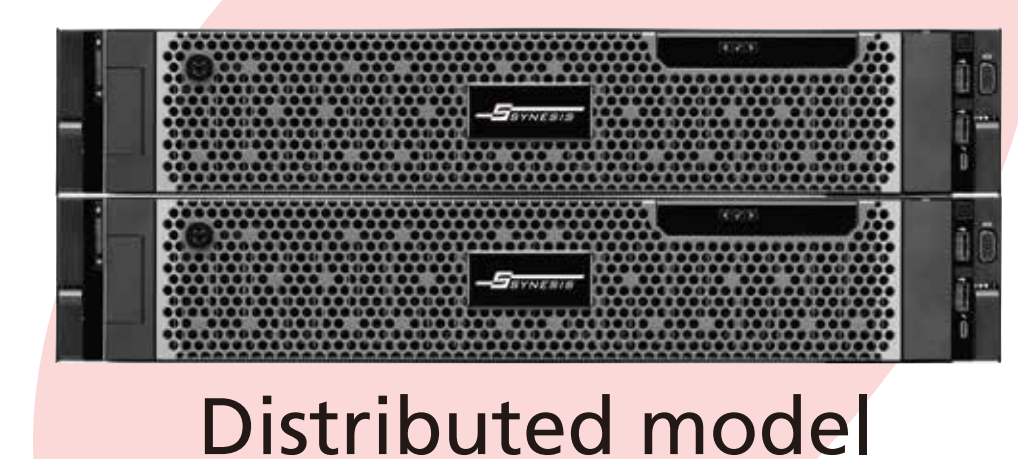

A customer's Quality of Experience (QoE) is of paramount importance, however, the typical user does not understand your network's growth and overall complexity. Spirent Virtual products collaborate with Spirent Hardware and Automation help you test and measure the performance of your network, apps, and sites to increase its performance, so users will never face limited speeds, site downtime, or complete outages due to high volumes of traffic.

SYNOPSIS NETWORK CAPTURE APPLIANCE

Key features

- Full line rate capture even at 200Gbps
- Support for 1G/10G/40G/100G interfaces
- Replay captured traffic
