# Spirent Cloud and NFV Continuous Testing

A customer's Quality of Experience (QoE) is of paramount importance, however, the typical user does not understand your network's growth and overall complexity.

Spirent Virtual products collaborate with Spirent Hardware and Automation help you test and measure the performance of your network, apps, and sites to increase its performance, so users will never face limited speeds, site downtime, or complete outages due to high volumes of traffic.

Spirent 400G Ethernet Solution

spirent™
Promise. Assured.
TOYO Corporation

Spirent is continually developing new solutions for testing 400G capabilities throughout the network.

pX3 400G Seven-Speed Appliance

✓ Industry's highest density QSFP-DD test appliance

✓ PAM4 and NRZ solution in one platform

✓ Provides large capacity testing for a variety of services

✓ 4 to 8 port upgrade available via licensing

pX3 2-Port Seven-Speed Test Module

✓ Industry's highest density single slot test modules

✓ Industry's first native OSFP test module

✓ PAM4 and NRZ (QSFP-DD) solution in one platform

✓ Provides large capacity testing for a variety of services
